Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I strongly object to the proposed 4G/5G mast installation near our homes due to serious concerns about health, especially for children and vulnerable people. As a resident , I am worried about the long-term effects of constant exposure to radiation, even if current safety standards are met. These fears are real and cause stress to myself and my

family. y. The mast would be placed close to homes, parks, and areas where children play, which is unacceptable.

It also risks lowering property values, as people are less likely to buy homes near such structures.

This installation offers little benefit to the neighbourhood, where mobile coverage is already good, and instead brings unnecessary risks and disruption to our daily lives.

Kind regards
