Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	This ghastly tower would introduce a 31.3 metre tall alien structure to a pleasant open area, which is not semi-rural as described, but in close proximity to houses. The proposed mast will devalue the sale price of properties and put off purchasers in the area as generally there is a greater public awareness of the harm EMF radiation is causing people, children, wildlife and the environment over a significant distance.

The Council cannot disregard any concerns about safety and health.

I have a pacemaker.

What proof have you that this will not effect me?

Having read various peer reviewed studies, there are concerns for people with metal in their bodies,for the effect of EMF on the animals, insects, and in fact for all of us.

This proposed structure is causing us fear and anxiety.

What insurance cover is held for any health harms that may occur?

Manor Field Primary School is only 300 metres away from the proposed site.

What consultation has taken place with the parents of children attending, and the Head of the School?

Have the potential dangers been explained sufficiently?

The mast and cabinets will consume a vast amount of electricity and also generate a lot of heat.

How does this align with your sustainability and environmental objectives or any climate emergency?

The consultation was not thorough enough, as neighbours I have spoken with were totally unaware of the planning application.

We have fears for the effect EMF radiation will have on our health,the health of our neighbours and the health of the children.

I ask you to reject this application, just as other Councils are doing who take the time to acquaint themselves with independent research on the harms of EMF radiation.

Kind regards
