I am writing to formally object about the massive mast that is planned to be erected on Land Adjacent to Rocky Lane, Haywards Heath, the proposed mast is excessively tall and visually intrusive, it will also impose on the local countryside. The height and industrial appearance are out of keeping with our residential neighbourhood. It will only be about 1/4 of a mile from our house and will be visible from our top windows. I believe it's going to be double the height of the neighbouring mature trees (about 25m high) , and it's totally unnecessary because it is to provide a signal to the train line, which already has good signal! There is already a similar mast just down the road.

I believe it could be a potential risk to health, which is a worry for our children growing up nearby, and I would rather not take the risk when there will be no benefit at all. It's also widely accepted that these signals interfere with wildlife like bees and other pollinators.

I respectfully request that the council refuse this application.

Thank you for considering my comments.

Yours faithfully
