[REDACTED]

Hi,

As I live next to the adjoining property I would like to make the following comments regarding the installation of the heat pump. This was installed without any discussion with myself in early Jan 2025. The concern is that it not only looks unsightly but does not conform to government standards. Firstly it is larger than .600 Meter cube. and the feet are 6 inches over the boundary onto our courtyard. It is also not 1 meter away and stands on heritage millstone. This I believe is detrimental to our property as Rowfant. Mill is grade 2 listed, I have tried to screen as best I can with potted shrubs but feel I should not be having to do this. I have raised my objections to this before with your colleagues and they agreed that there is a breach. I am sorry I can't agree with the application but I didn't make the rules. Please contact me if you need to discuss anything. Regards [REDACTED]
