Subject: Re Planning application DM/25/0589- 5G Telecommunication Mast - Burges Hill

[REDACTED]
15 Fry Crescent

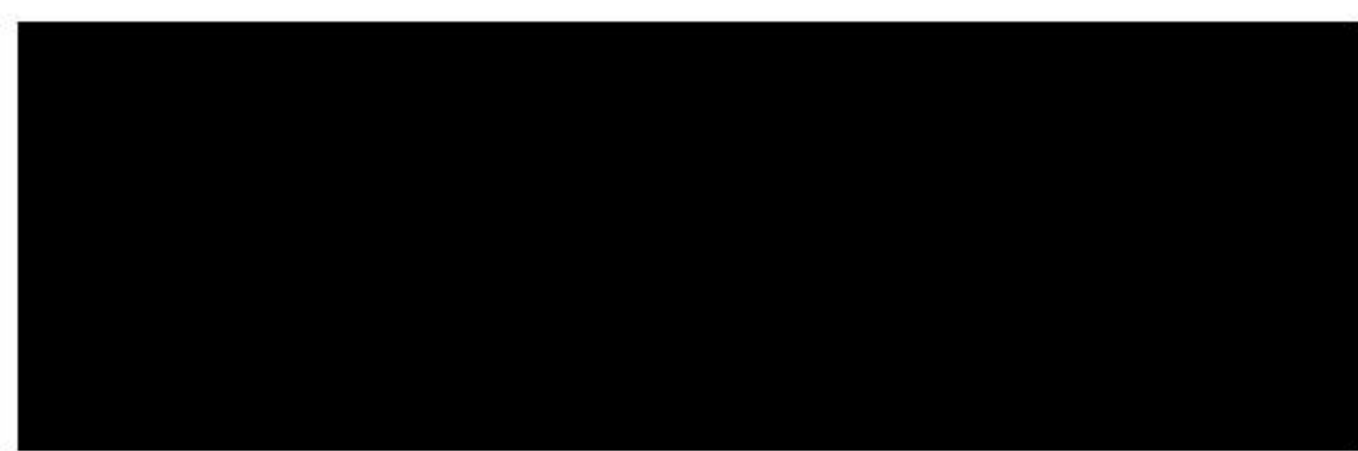

Burgess Hill
RH15 8TP

I want to object to the proposed planning application for a 5G Telecommunications Mast to the Land North of Leylands Road, Burgess Hill

Here are my main reasons:

1. 5G Cases studies show serious harm to health for those who live and work close to 5G masts. This is a very populated residential area and children in particular are significantly sensitive to EMF and the location of such a mast would be in close proximity to two primary schools- Manor Field (300m) and Sheddingdean (260m) . In reference to this , the New Hampshire Commission (now a Bill) has made reference to a distance of 500m for telecom installation
2. Many people are significantly sensitive to EMF frequencies and it can cause major stress and anxiety .In fact it is known that EMF's are affecting the health of many people at an underlying level. Furthermore, ICNIRP guidelines (2020) specifically exclude those individuals with a metal implant or an active medical device stating them to be "out of scope"
3. The mast would also be around the site of open grassland, next to popular foot paths which are used and enjoyed by many walkers and dogs, never mind the potential impact on the natural environment and wildlife. Evidence has shown that there has been a dramatic decline to both the number and types of species of insects. The ICNIRP guideline also do not cover any wildlife or plants and how does this proposal affect the council's Biodiversity Net Gain plans ?

Kind Regards
