Acoustic Barrier

SKU: ACOUSTIC-BARRIER

BUY **HIRE**

The Acoustic Barrier is an effective temporary sound-proofing blanket, designed to help protect local communities and employees from the harmful effects of excessive noise on site.

Acoustic Barriers are designed to offer superior noise and vibration absorption whilst working in and around construction sites.

This barrier is Multi-award winning and has been endorsed by Crossrail and Transport for London!

Blanket Type: **Full** Clear

Help 

The acoustic barriers will be in place for 10.95m on the east side of the security fence and completely along the south side (9.30m), both at a height of 2.05m. Both the coverage on the east side and the height of the panels are in excess of the original acoustics report stipulations of 6m along the east side and 1.8m in height.
