Stance: Customer objects to the Planning Application

Reasons for comment:

Comments:

These comments relate to the planning applications DM/25/0014, DM/25/0015, DM/25/0016 and DM/25/0017.

All previous objections to the applications still apply and do not seem to have been addressed in the new / revised applications.

There have been some assessments carried out relating to the northern access via Wychwood Place that suggest the private roads in the existing development meet current minimum requirements for two estate cars passing on the bend however there is no acknowledgement that there is no pavement at this point and therefore pedestrians will also be in the road. This is particularly concerning.

There also is little recognition of the increase in numbers of delivery vehicles for the significant increase in households and the care home. How will these pass on the narrow roads and sharp bend?

Other's suggestion of using the recently closed Hurst Farm as access instead seems a much more sensible approach that would alleviate many of the traffic related concerns.

Kind regards
