Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I would like to voice my objections to the proposal of a very substantial mast as outlined in application number DM/25/1495. Quite clearly a mast measuring 22.5m in height with all the associated antennae and equipment will have a very detrimental visual impact on those living in the nearby housing estate which lies in very close proximity. I do not believe such an obvious eyesore is warranted so close to

both residential housing and an area close to protected woodland and in an area of already diminishing open countryside with public access.

There are many reports which already raise safety concerns with these type of masts so I furthermore question the logic about locating a mast of this considerable size so close to existing housing.

Given the amount of concern already raised in this application I strongly feel a much better location for a mast of this type which takes into account peoples concerns and has far less visual impact on nearby housing should be sought.

Kind regards
