

Supporting statement

We had hoped to re-use the existing tiles but these unfortunately broke up when they were removed.

We would like to match our roof tiles with the slate tiles we are going to use for the outbuilding (agreed in the initial planning permission). We believe this would bring nice continuity to the site.

In addition, other houses surrounding ours have slate tiles, including Nenthorne East, and the church with surrounding buildings.

If you look at the west elevation (front of the house), there are very few tiles visible from the street, due to the gable roof and 4 solar panels.

The grey slate would look very clean with the solar panels.

To conclude, slate tiles will match the local area and bring continuity to our plot.
