Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	Good Morning, I received the letter for the above planning application only 2 weeks ago, However the work on the property has been going on for months and is now almost complete. We have had major issues with the project due the building contractor workers speeding recklessly past our property gates, and the huge vehicles which have been used to deliver goods and

also take away large amounts of hardcore from the site. our lane has suffered considerable damage with subsidence as the private lane is made to carry cars and small vans. I have contacted the local Jewsons yard to complain as most of the delivery vehicles were from there but that had no effect. These vehicles were 40ft delivery lorries with unloading cranes on the back. also huge tipper lorries were used to take away full loads from the site. not acceptable working practices and as planning offices you should make sure you insist on the max size of vehicles to be used on such project before agreeing planning, that is if planning has actually been granted??

Kind regards
