Good morning Miss Tidey,

Thank you for your response to our application. I forwarded it onto our supplier who has replied with the attached email with specifications of the window bar to be fixed to the new upvc windows. I trust this would be sufficient to allow the application to be approved?

To add a personal note, my wife and I have a little boy of ten weeks old who has contracted severe bronchiolitus over the winter which is worsened by cold air. As soon as the issues with the timbre windows were spotted, we endeavoured to get them changed but this has been a long process. I would appreciate that, if this email is sufficient, the case is then approved as quickly as physically possible to protect my son. If there are other issues with the application, please can these all be sent at once to be resolved so as the work can be undertaken quickly?

I appreciate your understanding.

Many thanks,

[REDACTED]

Morning Daniel

Please find attached details of the bar which would be fixed at the bottom of the window .

I must be honest, I have replaced windows in Bolnore previously and not been asked to install this but if it is what the planners require then it is not a problem.

I hope this helps

Paul

[REDACTED]
Morning Daniel

The photo of the window shows an overhang on the bottom bead as timber windows occasionally require this. The uPVC window does not need this as it weathers differently, however, I can fit a drip bar in this position purely for aesthetic requirements.

I have asked my supplier to forward an image and dimensions of this component. They will not have an image of it on a window as it is normally used for open in doors.

I hope that this helps.

Kind regards

Paul

Good evening Paul,

I hope you had a lovely Christmas and New Years break.

For the work on 104 Middle Village, we have received the following response from our Planning Application.

I was wondering whether there is any way of providing assurance that the windows will be the same, as per the comment at the end of the email. We're desperately hoping this is the last step in the process as we've been waiting on the permission to come through since the middle of November.

Many thanks,
[REDACTED]

Haywards Heath**

Dear Mr Woodfield

I refer to your planning application for 'Replacement of 3 timber windows with 3 uPVC windows of the same look and colour', for which I am the Case Officer.

I was on site at your property yesterday to view the current windows, and the others in your block. I note that the existing windows are all of a similar style in the block and the elevation on which your three windows are located is publicly visible in the street and from the car parking area below. The current windows have a projection on the lower pane, above the window sill (see below photo of a ground floor window in your block).

I have reviewed the proposed window plans that have been submitted with your application, extract below:

I am aware that your application is not the first in the block, there having been an approval at No 82 under DM/24/2677 to 'Replace white wooden windows and patio doors with white uPVC double glazing windows and door.'

The submitted illustration for DM/25/2859 does not clearly show this projection on your proposed windows. Please can you assure me that the design of the replacement windows will exactly match the external appearance of the existing windows to maintain a consistent appearance on the block? Your supplier may be able to provide cross sections or more detailed design drawings to support the proposal?

I look forward to hearing from you.

Regards

Anna Tidey

Planning Officer
